The American Recovery and Reinvestment Act (ARRA) or "Stimulus Bill" was signed into law last February to put the United States back on a sustainable, long-term growth path. Across the state of Georgia, the recovery package has brought thousands of new jobs, modernized schools, and extended unemployment benefits for people out of work.

Since the passage of the bill, Stimulus dollars have been pouring into Georgia's Second Congressional District. Below you will find a map that charts where and how these funds are being spent in our local communities. Please note that map is constantly being updated as new funding is awarded.

See my **Guide to the American Recovery & Reinvestment Act** .
